RESEARCH PAPER FORMAT

Page-by-Page Structure for Copyright Submission.

PAGE 1 — TITLE PAGE

This page establishes authorship and ownership at a glance — the first thing the examiner sees.

- Title of the research paper — centered, bold, top of page
- Full names of all authors, in the order of contribution
- Affiliation — department, college/university name, city
- Name of project guide/supervisor (if applicable)

  Copyright notice line: © [Year] [Author Name(s)]. All Rights Reserved. — placed at the bottom of the title page

  Date of completion of the work
- Corresponding author's email ID

PAGE 2 — ABSTRACT & KEYWORDS

- Abstract — 150 to 250 words summarising the problem, method, and key result/contribution
- Keywords — 4 to 6 terms, comma-separated, representing the core subject areas
- This page should not contain any content copied from another published source — the abstract must be in the authors' own words, since copyright protects only original expression

PAGE 3 — TABLE OF CONTENTS (optional)

- List of sections with page numbers
- List of figures and tables, if the paper has several

PAGE 4 ONWARDS — MAIN BODY

1. Introduction

- Background of the problem area
- Motivation — why this problem matters
- Clear statement of the objective(s) of the project/paper
- Brief outline of the structure of the remaining paper

2. Literature Survey / Related Work

- Summarise prior work relevant to your topic, in your own words

Every external source must be cited with a reference number [1], [2], etc.

End with a short paragraph identifying the gap your work addresses

3. Proposed System / Methodology

- Describe your approach, algorithm, model, or system design
- Include original diagrams: architecture diagram, flowchart, block diagram — hand-drawn or self-made, not copied from any source
- Describe tools, technologies, datasets, and techniques used

4. Implementation

- Describe how the proposed system was built

- Include relevant code snippets, module descriptions, or configuration details
- Screenshots of the working system, if applicable (label each figure)

5. Results and Discussion

- Present results using tables, graphs, or charts generated from your own experiments/data
- Compare against existing methods, if applicable, with a clear discussion of improvement
- Discuss limitations honestly

6. Conclusion and Future Scope

- Summarise what was achieved
- State the contribution of the work in one or two sentences
- Mention possible future extensions

7. Acknowledgment

- Thank your guide, institution, or anyone who supported the project (kept brief, one paragraph)

8. References

- List all cited sources in a consistent citation style (IEEE, APA, or as required by your institution)
- Only sources actually cited in-text should appear here — an inflated reference list unrelated to citations can raise originality concerns during copyright examination

LAST PAGE — AUTHORSHIP & ORIGINALITY DECLARATION

Add this page at the very end of the document before submitting it to the Copyright Office. This is the page examiners look for to confirm the applicant's claim of original authorship.

DECLARATION

We, the undersigned, declare that this research paper titled "_____" is our own original work, carried out under the guidance of _____ at _____, and that it has not been copied from any other published or unpublished source. We are the sole authors and rightful owners of the copyright in this work.

Sr. No.	Author Name	Signature	Date

FORMATTING CHECKLIST BEFORE UPLOADING TO THE COPYRIGHT PORTAL

- Consistent font and heading style used throughout (e.g., Times New Roman 12pt body, 14pt headings)
- Page numbers on every page
- Title page carries the © copyright notice and date
- All figures/diagrams are original or properly credited with permission
- No verbatim text copied from another paper anywhere in the document
- Declaration page signed by all authors, placed at the end
- Final document saved and exported as PDF (this PDF is what gets uploaded as the 'copy of the work' under Form XIV)
